Our Ref. No.: 42390.P10573

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Patent Application of:

Darren L. Abramson, et al.

Application No.: 09/896,769

Filed: June 29, 2001

For: METHOD AND APPARATUS FOR
DETERMINISTIC REMOVAL AND
RECLAMATION OF WORK ITEMS
FROM AN EXPANSION BUS
SCHEDULE

Examiner: Spittle, Matthew D.

Art Unit: 2111

SUPPLEMENTAL DECLARATION PURSUANT TO 37 C.F.R. §1.132

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

I, Darren L. Abramson, hereby declare that:

1. I am a citizen of the United States of America.
2. I currently reside at 1301 Fogerty Court, Folsom, CA 95630.
3. I am currently an employee of Intel Corporation, Santa Clara, California.
4. I have been employed by Intel Corporation since July 8, 1991.
5. My position at Intel Corporation is Principal Architect.
6. I am a co-inventor of the above-identified patent application.
7. I have assigned my rights to the above-identified patent application to Intel

Corporation.

8. I have reviewed the "Enhanced Host Controller Interface Specification for Universal Serial Bus", revision 0.95, dated November 10, 2000 from Intel Corporation of Santa Clara, California ("EHCI Specification"). The Examiner has cited § 4.8.2, page 68-70 of the EHCI Specification against the claims of the above-identified application.

9. The EHCI Specification lists eleven (11) individuals as significant contributors, or co-authors, of the EHCI Specification. A copy of the EHCI Specification listing the eleven (11) co-authors is filed herewith.

10. The EHCI Specification lists me, Darren L. Abramson, as well as my co-inventor, John S. Howard, as co-authors of the EHCI Specification. The EHCI Specification includes subject matter that was prepared based upon co-inventor John S. Howard and my own original work. The subject matter described in § 4.8.2 of the EHCI Specification was entirely conceived by myself and John S. Howard. The other authors of the EHCI Specification did no more than review and provide comment on this section of the document.

11. The inventorship of the instant application is correct in that § 4.8.2 of the EHCI Specification discloses subject matter that was conceived by Darren L. Abramson and John S. Howard, the Applicants of the instant application, rather than the other named authors of the EHCI Specification, notwithstanding the authorship of the EHCI Specification. The contribution of the nine other named authors to the EHCI Specification, other than the comment and feedback on § 4.8.2 discussed above, was limited to subject matter that is not claimed in the above identified application.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the above-identified application or any patent issued thereon.

Respectfully submitted,

Dated: January 11, 2007

Darren L. Abramson
